NANOG 64 CALL FOR PRESENTATIONS NOW OPEN

Speakers Invited to Submit Proposals for the June 1-3 Conference in San Francisco, CA

FREMONT, CA, MARCH 17, 2015 – The North American Network Operator's Group (NANOG) is pleased to announce the Call for Presentations for NANOG 64, hosted by Netflix taking place at the Westin St. Francis in San Francisco June 1-3, 2015.

The NANOG Program Committee is seeking proposals for presentations, panels, tutorials, tracks sessions, and keynote materials for the NANOG 64 program. Candidates are encouraged to submit presentations highlighting issues related to technology already deployed or soon-to-be deployed over the Internet. Vendors are encouraged to work with operators to present real-world deployment experiences involving vendor products and interoperability. NANOG 64 offers opportunities to network with colleagues, sharpen skills, learn advanced networking techniques and discover new network applications.

Submissions in all areas of network operations will be considered, including (but not limited to) topics regarding:

- **Power and Facilities** - Power reliability and engineering, green power, power efficiency, cooling, and facilities management;
- **Interconnections** - Internet Exchanges (IXs), intra-building, MMR, metro-wide connections, peering, and transit purchasing tactics and strategies;
- **Security** - Routing security, route filtering of large peers/customers, and inter-AS security and cooperation;
- **Domain Name System (DNS)** - DNS data for network metrics, botnet discovery, and geolocation;
- **IPv6** - Real-world deployment challenges, Carrier-Grade NAT, NAT-PT implementations that work and scale, and allocation strategies;
- **Content** - Distribution (p2p, IPTV), content payment models, content distribution technologies and networks, and storage/archiving; and
- **Disaster Recovery** - Risk analysis, training, agencies, planning methods, hardware portability, key tools, transport audits, and other lessons learned.

The "Call for Presentations" (CFP) deadline for presentation abstracts and draft slides are due by March 30, 2015. To submit a presentation for consideration at NANOG 64, use

the tool located on the NANOG Program Committee Site. Lightning talk proposals may be submitted on the Program Committee Site starting June 1, 2015.

The NANOG 64 topic list will be posted April 13, 2015. The final NANOG 64 agenda will be published May 4, 2015.

About NANOG
NANOG is a community of industry experts that work together for the common good of the Internet. In many ways, the NANOG community serves as the heart and soul of the Internet. This close-knit group meets three times a year to discuss all issues, large and small, as they relate to the performance, accessibility and evolution of the Internet. NANOG is dedicated to improving the Internet for all major sectors (public, private, education, and consumer) in all corners of the world. NANOG is a non-profit organization and relies on sponsors to help with costs for its tri-annual conferences as well as managing ongoing communications. Annual sponsors include Microsoft, NTT Communications, Netflix VeriSign, ADDREX, Google, and Comcast. To learn more, visit: https://www.nanog.org.
