Level (3)

Integration Phases

- Strategic Plan
    - Which ASN do we pick, AS 3356, AS 3549 or AS 1?
        - Will have a converged backbone or a backbone dedicated to Internet?
    - BGP local-preference change between ASN's
    - Port moves
        - Internet view changes (^3549_3356 changes to ^3356_3549
        - BGP communities change somewhat
        - Level 3 routers use router id's in 4.x which may win more ties with peers
        - Portal, billing, contract, etc. remain unchanged
    - Router uplink moves
    - Flag day AS-change

Integration progress

- Strategic Planning (complete)

- BGP local-preference change completed in November of last year

- Tactical planning

    - Began planning grooms in April, but we've really started to hit a rhythm in August

    - Focused on moving customers where we are consolidating facilities (e.g. Atlanta) as well as improving reliability for customers (decommissioning M40's)

    - Hundreds of port grooms approved, thousands more expected in the coming months

- Big customers with multiple ports across the country require special attention

    - I recommend customer's with a complex environment contact their account team to proactively manage their migration across networks.

- Flag-Day tentatively scheduled for late 2013

Unique Maintenance Notification

Level (3)

Stronger Connections. New Possibilities.

Level 3 Planned Maintenance Notice

Dear Customer;
Please be advised of the upcoming network activity.
Please forward all inquiries to **gblx_chgmgmt@globalcrossing.com**

Case Number	**PA1060510.1**
Start Time	2012-07-12 04:00:00 GMT
End Time	2012-07-12 10:00:00 GMT
Impact	Expect a loss of service for 30 minutes.
Activity Location	Miami, FL
Activity Details	Level 3 will be performing a network groom. http://www.level3.com/en/network-migration-information/
