 - Where to find it
 - <https://www.nanog.org/list>
 - Who is on it
 - Network operators from around North America
 - Who can join?
 - The list is open to anyone and everyone

The NANOG Mailing List

- What is the NANOG Mailing List
 - Why Join?
 - The NANOG Mailing list gives you access to network operators across North America
 - Topics Discussed
 - Network issues
 - Policy discussions
 - Configuration questions
 - Route leaks

The NANOG Mailing List

- Some statistics for this year
 - NANOG Mail List has 13,158 subscribers
 - Average of 76 individual threads per month in first quarter
 - Average of 580 messages per month

The NANOG Mailing List

- Some of the Top Threads by month
 - January
 - Binge On! - get your umbrellas out, stuff's hitting the fan
 - Discussion centered around net neutrality
 - IPv6 Travesty that is Cogent's refusal to peer with Hurricane Electric - and how to solve it
 - Discussed full route table provided by transit providers due to differing peering policies for IPv6 vs IPv4
 - Another Big day for IPv6 - 10% native penetration
 - Discussed the statistics of IPv6 penetration at end of 2015 compared to 2012

The NANOG Mailing List

- Some of the Top Threads by month
 - February
 - Cable Operator List
 - Looking for a mailing list for Cable Operators, resulting in discussion on NANOG list as no other list was widely known/used
 - Thank you, Comcast
 - Discussion around the company suspending subscriber connections used for DNS amplification
 - sFlow vs netFlow/IPFIX
 - Discussion comparing sFlow and netFlow technologies, applications, and recommendations for operators

The NANOG Mailing List

- Some of the Top Threads by month
 - March
 - Internet Exchanges supporting jumbo frames?
 - Discussion about adoption of jumbo frames in IPv6 vs IPv4 and reaching agreement on a max MTU setting
 - Why the US Government has so many data centers
 - Discussion on what actually qualifies as a data center and what types of equipment need what levels of support (production, development, test, etc)
 - Cogent - Google - HE Fun
 - More discussion about IPv6 peering, and what operators are seeing on their networks

The NANOG Mailing List

- Other Mailing Lists

- Attendee
