

## Endorsements for David Siegel

**From: Sylvie LaPerriere**

David is a good balance of technical, relational and managerial skills. He has deep networking roots, a long experience and an impressive work ethics. He shares NANOG's desire to deliver operationally-relevant formal training. Over the past two years, David recognized NANOGers' desire to have a formal training track around the conference times. He wasted no time in volunteering and structured our first 'Routing Fundamentals' training launching our Education Series at NANOG59.

David will not be at NANOG, but that should not be a factor in your decision. The majority of the Board work is conducted over conference calls and via emails. David already demonstrated how he can aptly share his experience and make valuable contributions to the Board activities.

Vote for David Siegel and bring his talent, work ethics and strategic vision to the Board.
